Formulary Medications Available at the VBA Pharmacy

The Virginia B Andes Volunteer Pharmacy is the only pharmacy in Charlotte County dedicated to providing free pharmaceutical care to the residents of our county. The patients that we serve are carefully screened and include the homeless, people who have lost their jobs and the working poor who cannot afford prescription insurance. Our mission is to improve access to medications and provide healthcare advocacy and educational services to this underserved population.

- This formulary lists our most prescribed medication that are available immediately.
- We will make every attempt to fill non-formulary medications or contact you regarding alternate options.
- Brand name medications are usually obtained thru manufacturer assistance programs (PAP) however we normally are able to provide a first fill upon completion of PAP application.
- As availability of medications change frequently we may substitute a therapeutically equivalent drug as agreed upon by the provider under a collaborative agreement.
- If a patient is out of refills for a medically necessary maintenance medication our pharmacy may provide the patient with a 30 day interim supply until a new order is received.
